20. Carabiner Clip

**20 Tools
in One**

BLAK™ Series

The Tac20™ has non-reflective black oxide-coated steel tools and a titanium-coated knife blade for increased corrosion resistance and durability. Weighing just 11 ounces, this tool packs a lot of function in a compact case.

One side of the Tac20 houses the Torx and Allen drivers along with a 3/32" pin punch which can be unscrewed to reveal a male threaded 8-32 connector for use with cleaning kit accessories.

The other side offers a dual lug M4 castle nut spanner wrench for automatic rifle assembling needs as well as dual hex wrenches for LaRue mounts and scope rings. An arm with a magnetic bit holder with a #1 Phillips screwdriver bit doubles as a front sight adjustment wrench. The remaining 1/4" bits are housed inside the tool's storage compartment. A double edged spear point knife with titanium coating and the essential LED flashlight with replaceable batteries rounds out the list of handy features on the Tac20.

Feature Summary

3/32" Flat Screwdriver Bit	1
